

Savings Calculator User Manual

This App was created to calculate the earnings of savings accounts that compound monthly. The app allows the user to make calculations of how much their account will grow and have files saved into their computer to keep track of all their information.

Instructions for first time use:

For first time use
file named
"FirstUse" must be
in this field

FirstUse	
1	FirstUse
2	2024-04-10
3	0
4	0
5	0
6	0

When using app for the
first-time user is only
required to put in a
"deposit" to set the
initial value of their
account

"FirstUse" file is a file
to address an FileNotFoundException
and can be deleted
after the app is used.

User Friendly file created to review
information.

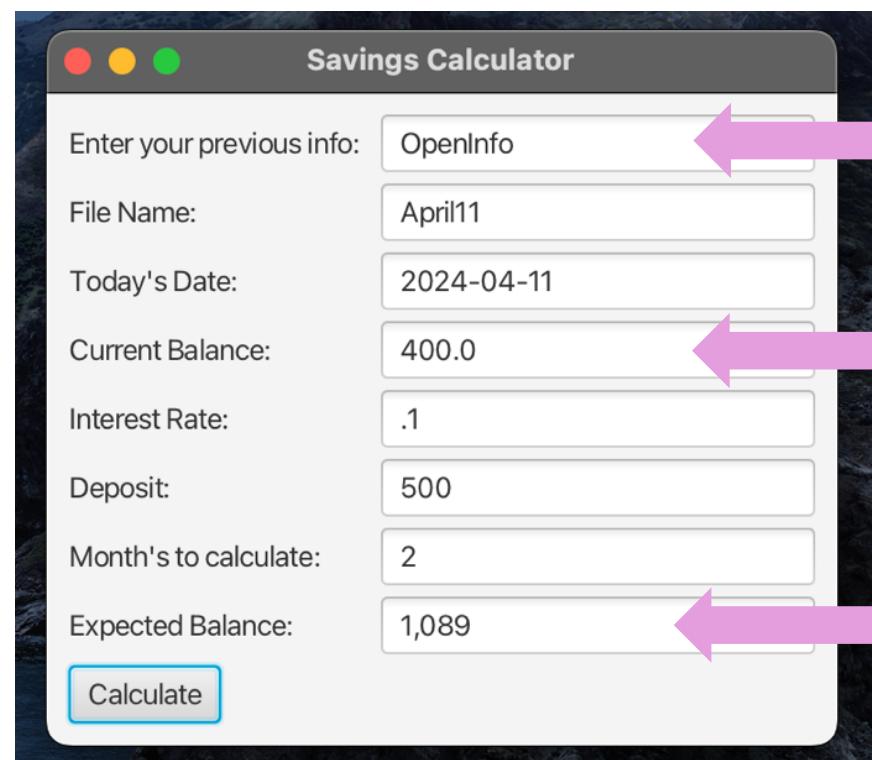

Summary:OpenInfo

Instructions for continued use:

User must input information into all fields including the file that was made by the app the previous time it was used. This will allow for data to be retrieved and all calculations to be made.

User must input program-made files
to retrieve information from
previous uses.

When calculate button is pressed:
App will retrieve the current account
balance.

When calculate button is pressed:
App displays expected balance
